

HUMIDITY SEPARATORS S25/SS (Stainless steel) PN16 – PN40

DESCRIPTION

S-25SS series centrifugal separators remove moisture from steam and compressed air pipelines. Steam and compressed air passing through the separator and as a result of centrifugal forces, impact and swirling effects, separate the particles with a heavier specific gravity, such as water and oil droplets, moisture in suspension, dirt and scale.

The condensate collected at the bottom of the separator, must be automatically drained by a suitable steam or compressed air trap.

Connections are flanged.

MAIN FEATURES Several possibilities of installation. No moving parts.

- OPTIONS: Condensate flanged connection.
- USE: Steam, compressed air and other gases (Group 2).
- AVAILABLE MODELS: S25/SS Stainless steel body.

SIZES: DN15 to DN300.

PIPE CONNECTIONS: Flanged EN1092-1 PN16 and PN40 ANSI Class 150 lbs and Class 300 lbs Female screwed BSP or NPT on request.

INSTALLATION: Always with the condensate discharge pointing downwards. See IMI, installation and maintenance instructions.

HOW TO SELECT: Generally, in an existing plant it is advisable to fit a separator of the same size of the pipe line. Pressure drop is normally negligible. For approximate pressure drop calculation please consult.

* Volume correspond to the class PN16 design.Classes PN25 and above may have slightly lower volumes. ** Weight correspond to the class PN16 design.

F-screwed drain connection as standard. Alternatively can be supplied flanged EN1092-1 or ANSI on the same class of main dimensions.

Consult factory for certified dimensions. Dimensions subject to change without notice.

Note: the top of separator is supplied with a threaded connection with size not exceding the size of drain one. This connection is always supplied closed with a threaded socket. It can be used for air vent or balancing pipe connection.
